Full-Stack Developer · Lagos, Nigeria

Full-stack developer building web apps end to end: React and Next.js interfaces on top of Python and Django APIs. Security-first by habit, with most of my work where payments, APIs and interfaces meet.

EXPERIENCE

API tester & team lead · company name private, hybrid — May 2026-present

- Test APIs for correctness, reliability and edge cases before they reach users; lead the team and keep delivery on track.

Full-stack developer · company name private, hybrid — Jan 2026-present

- Build and ship features across the stack, from the interface to the API and database behind it.

UI/UX designer · company name private, hybrid — Aug 2025-present

- Design user interfaces and user flows that turn product requirements into clear, usable screens.

Front-end developer intern · Dervac Hub, Lagos — 2024 · 6 months

- Turned designs into responsive web pages and reusable interface components.

PERSONAL PROJECTS

Quicksurf · airtime and data payments — 2025-2026 · live

- Built the Django REST backend (VTpass delivery, Paystack-funded wallets and webhooks, JWT auth, idempotent purchases, reward points) and the Next.js client (quicksurf-frontend.vercel.app).

Django REST · PostgreSQL · Redis · Paystack · Next.js · TypeScript

Web X-Ray · automated website testing — 2026 · in progress

- Explores a site you're authorised to test, runs user journeys on desktop and mobile, then writes and runs a Playwright test to confirm each failure.

FastAPI · PostgreSQL · Redis · Playwright · Next.js · Tailwind CSS

PayIntent · rule-based mobile payments — 2026 · open source

- Expo app for payments with rules: hold funds until delivery is confirmed, cap spending by category, or release once work is approved.

React Native · Expo · TypeScript · Zustand

LandKrypt · fractional ownership of virtual real estate — live

- Splits virtual properties into fractional NFTs that holders stake, vote on and earn from (landkrypt-fe.vercel.app).

React · Web3 · Solidity

Side builds: NobleKin Bio (bioinformatics institute website, Next.js) · MediRemind (medication reminders, Next.js and Resend) · Keyra Protocol (GameFi and DeFi landing page).

SKILLS

LANGUAGES	TypeScript, JavaScript, Python, HTML & CSS
FRONTEND	React, Next.js, Tailwind CSS, Framer Motion, React Native & Expo
BACKEND	Django & DRF, FastAPI, Node.js, REST APIs, JWT auth
DATA & INFRA	PostgreSQL, Redis, MongoDB, Docker, AWS (EC2, S3), Vercel, Render
TOOLING	Playwright, Git & GitHub, CI/CD

EDUCATION

Software Engineering · University of Lagos (UNILAG) — 2022-2026

Software Development · NIIT Ikeja, one-year programme — 2025
